رؤية
VISION
2030
المملكة العربية السعودية
KINGDOM OF SAUDI ARABIA

JVR Global is supported by a team of experienced professional engineers and highly skilled craftsmen from India, the Philippines, Pakistan, and Nepal. With in-house equipment resources and strong operational capability, we ensure efficient on-site execution and timely delivery for every project.

We specialize in Civil, Mechanical, Electrical, and Instrumentation works, serving a wide range of industries across the Kingdom of Saudi Arabia, including Power Plants, Oil & Gas, Refineries, Water & Wastewater Treatment, Petrochemicals, Manufacturing, Cement, Mining, and Chemical sectors.

Headquartered in the Eastern Province of Saudi Arabia, JVR Global operates exclusively within the Kingdom, providing reliable, high-quality technical and industrial services to support national development and infrastructure growth.

Our Vision

Our vision is to set the industry benchmark as a leading civil and construction contractor, delivering excellence across buildings, roads, food & beverage facilities, and real estate developments.

Our Mission

Our mission is to build a professional organization that delivers outstanding services with uncompromising quality. We are committed to producing high-quality work in accordance with established engineering standards, delivering results that exceed client expectations, and ensuring timely project completion while strictly adhering to safety requirements.

Why Choose Us

01

Customer Focus

We proactively understand, anticipate, and fulfil client requirements to ensure complete satisfaction on every project.

02

Continuous Education & Innovation

By empowering our team with regular training and the latest technologies, we set high standards and stay ahead in a rapidly evolving construction industry.

03

Strong Commitment

Our passionate and driven team is dedicated to delivering exceptional service and consistently exceeding client expectations.

04

Integrity & Transparency

We operate with honesty, accountability, and ethical practices, building long-term trust with our clients and partners.

05

Professional Excellence

Every project is executed with professionalism, technical expertise, and attention to detail to ensure successful outcomes.

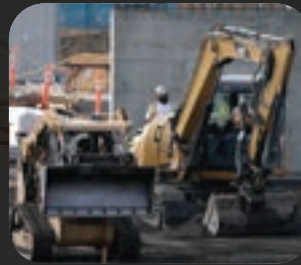

Civil Services

Backfilling & Excavation

JVR Global brings extensive expertise in backfilling and excavation, forming the foundation of efficient and safe project execution. We carry out site excavation with precision, strictly following industry-leading safety and engineering practices. Our backfilling operations involve the systematic placement and compaction of approved materials to ensure soil stability, strong foundations, and long-term structural durability.

Using advanced machinery and skilled manpower, we deliver reliable groundwork solutions while maintaining environmental responsibility and operational excellence.

Our expertise includes

- Multistoried and high-rise commercial & residential buildings
- Substation and central control buildings
- Pump stations
- Hospitals and hotels
- Warehouses and industrial facilities
- Temporary site offices and labor camp facilities

Building Construction – Industrial, Commercial & Residential

JVR Global has vast experience in executing a wide range of industrial, commercial, and residential building projects.

Our portfolio includes power substation buildings, control rooms, pump stations, residential apartments, hotels, villas, and more. All projects are delivered with strict adherence to international quality standards, safety regulations, and project specifications.

Fencing Works

We provide durable and reliable fencing solutions designed to enhance security while maintaining long-term performance.

Our fencing systems combine strength, functionality, and aesthetic appeal, contributing to effective property protection and site management across industrial, commercial, and infrastructure projects.

Foundation Works

We provide durable and reliable fencing solutions designed to enhance security while maintaining long-term performance.

Our fencing systems combine strength, functionality, and aesthetic appeal, contributing to effective property protection and site management across industrial, commercial, and infrastructure projects.

JVR Global contributes to the development of resilient road infrastructure that connects communities and prioritizes public safety.

Asphalt Works & Road Marking

Our expertise in asphalt paving and road marking reflects our commitment to quality, safety, and precision.

Equipped with modern machinery and an experienced workforce, we execute asphalt works that deliver smooth, durable surfaces capable of withstanding heavy traffic and harsh conditions. Our road marking services ensure clear visibility and effective traffic guidance, enhancing road safety and operational efficiency.

Our expertise includes

- Installation of HV / MV power transformers, GIS, switchgear, MCC, ATS, VFD, bus ducts, and cable bus systems
- Installation of standby power systems and UPS systems
- Installation of hazardous area electrical systems
- Installation of MV / LV power distribution systems
- HV / MV / LV cable laying, glanding, termination, splicing, and testing
- Installation of internal and external lighting systems
- Installation of grounding and lightning protection systems
- Installation of fire and gas detection and alarm systems
- Transformer oil filling, processing, and filtration
- Installation of cable trays and conduit systems
- Installation of emergency diesel generator systems
- Installation of all associated power distribution and control systems

Electrical Services

JVR Global delivers comprehensive Electrical Engineering, Procurement, and Construction (EPC) solutions for a wide range of electrical systems. We specialize in the installation, testing, pre-commissioning, and commissioning of complete electrical power systems across various voltage levels, up to 380 kV.

Our expertise covers GIS, power transformers, protection and control systems, VFDs, and all associated substation auxiliary equipment, ensuring safe, reliable, and efficient operations.

**Design.
Build.
Deliver.**

Instrumentation Services

JVR Global provides end-to-end instrumentation services delivered by highly experienced instrument engineers and technicians. We execute on-site field instrumentation works with the highest standards of quality, safety, and precision, supporting industrial and infrastructure projects across multiple sectors.

Our expertise includes

- Installation of field instruments, control valves, analyzers, vendor skids, and control systems (DCS, PLC, and SCADA)
- Installation of cable trays and conduit systems
- Cable pulling, glanding, and termination works
- Installation and leak testing of instrument impulse tubing and air lines
- Loop checking and functional testing of field instruments and control valves
- Calibration of all types of gauges, transmitters, and valves
- Fiber optic cable laying, splicing, and testing
- Installation of communication systems, including telephone systems, PAGA, CCTV, and LAN

Mechanical Services

JVR Global delivers cost-effective and high-quality mechanical solutions supported by an experienced project management team and skilled technical workforce.

We have extensive expertise in piping and mechanical works across petrochemical and refinery projects, power plants, desalination facilities, industrial, and manufacturing sectors. All projects are executed in strict compliance with international quality, safety, and schedule requirements.

Our projects are supported by in-house pipe spool fabrication facilities, available both at our base workshop and site fabrication yards, with a production capacity of up to 15,000 dia-inch per month per single shift. We are capable of fabricating carbon steel, stainless steel, alloy steel, and other exotic materials. Our specialization covers complete mechanical works from fabrication to erection, testing, pre-commissioning, and commissioning.

JVR Global is equipped to meet the most demanding project schedules, including mechanical completion, testing, and commissioning, supported by modern fabrication plants and efficient execution methodologies.

Our expertise includes

- Engineering, Procurement, Construction, Commissioning, Maintenance, and Upgradation of mechanical systems
- Process piping and utility piping
- Pipeline works and onshore plot piping
- Pipe spool fabrication, including jacketed piping
- Skid assembly and erection of skids and vessels
- Erection of pressure equipment, including pressure vessels, columns, heat exchangers, and compressors
- Turnaround and revamping works
- Structural steel erection and bolt torquing
- Tank fabrication and erection works
- Hydrostatic pressure testing for piping and valves
- Installation of valves, flanges, pumps, and cranes
- Erection of pumping stations and analyzers
- Installation of compressors, vacuum chambers, tanks, and boilers
- Water treatment systems, chillers, chemical skids
- Installation of heat ovens, steamers, and complete HVAC systems

- Pipe insulation services
- Fabrication of shell & tube heat exchangers
- Fabrication of pressure vessels
- Fabrication of industrial coolers
- Supply, installation, and testing of underground piping systems (GRP, FRP, HDPE, and UPVC)

“Efficiency in Every Duct, Quality in Every Build.”

HVAC Construction

We design, install, and maintain Heating, Ventilation, and Air Conditioning (HVAC) systems for residential, commercial, and industrial facilities.

Our Services includes

- Centralized HVAC systems
- Ducting and insulation works
- Chiller plants and VRF/VRV systems
- Ventilation and air filtration solutions
- Preventive maintenance and servicing

Our HVAC solutions are energy-efficient, reliable, and designed for long-term performance.

Solar Works

JVR Global provides reliable and cost-effective solar infrastructure services, supporting utility-scale, commercial, and industrial solar projects. Leveraging advanced machinery, proven engineering practices, and experienced technical teams, we deliver high-quality solar foundation and installation solutions designed for speed, accuracy, and long-term performance.

With a strong focus on mechanized execution, safety, and quality control, JVR Global enables clients to achieve faster project completion while significantly reducing overall project costs.

Our Services includes

● Advanced Process Execution

We adopt machine-based, automated construction processes that ensure precision, consistency, and efficiency across all solar foundation and installation activities.

● Cost Efficiency

Our mechanized approach delivers substantial cost advantages compared to conventional methods, helping clients achieve savings through optimized processes, reduced material dependency, and minimal monitoring requirements.

● Low Labour Dependency

Our mechanized approach delivers substantial cost advantages compared to conventional methods, helping clients achieve savings through optimized processes, reduced material dependency, and minimal monitoring requirements.

● Faster Project Timelines

Our execution methodology allows rapid installation readiness, enabling immediate structure mounting. Projects can be carried out efficiently even in harsh weather conditions, ensuring timely delivery without compromise.

● High-Speed Execution

JVR Global is equipped to handle large-scale solar projects with speed and scalability, delivering high-volume installations while maintaining strict quality and safety standards.

● Superior Quality & Accuracy

Quality control is streamlined through factory-fabricated and pre-checked components. Automated alignment systems ensure high accuracy, structural stability, and long-term durability of solar installations.

Fire Fighting Services

JVR Global offers complete fire fighting and fire protection services, covering the installation, maintenance, monitoring, and retrofitting of advanced fire safety systems.

Our solutions are designed to protect life, property, and assets while complying with relevant safety codes and regulations.

Our Services includes

- Installation and maintenance of fire hydrant systems
- Installation and maintenance of fire sprinkler systems
- Fire alarm and fire detection systems
- Fire suppression systems for critical and high-risk areas

“

Your safety is our priority

Telecommunication Construction

JVR Global provides reliable, cost-effective, and high-quality telecommunication solutions supported by an experienced project management team and a skilled technical workforce. We specialize in the design, installation, integration, and maintenance of telecom infrastructure across industrial, commercial, utility, and infrastructure projects.

Our telecommunication projects are executed using modern tools, certified technicians, and proven methodologies to ensure seamless connectivity, system reliability, and long-term performance.

Our Services includes

- Engineering, procurement, installation, testing, commissioning, and maintenance of telecommunication systems
- Structured cabling systems (copper and fiber optic networks)
- Fiber optic cable laying, splicing, termination, and testing (OTDR)
- Telecom tower infrastructure works and equipment installation
- Installation of LAN, WAN, and data networking systems
- Installation and configuration of IP telephony and PABX systems
- CCTV surveillance systems, access control, and video management systems
- Public Address (PA) and voice evacuation systems
- Installation of wireless communication systems and Wi-Fi networks
- Integration of telecom systems with BMS and SCADA

Material Supply

At JVR Global, we go beyond construction—we support industries with reliable Material Supply solutions that meet the highest standards, including Saudi Aramco specifications.

“Quality You Can Build On.”

We supply

- All kinds of Electrical & Instrument Accessories
- Stainless Steel Tubes with Fittings (plain & PVC coated, supplied in coils & straight lengths)
- Cable Ladder Trays with accessories
- Perforated Trays with accessories
- Conduit Pipes & Fittings
- Earthing & Lightning Protection Systems Wiring Material
- Terminals, Core Markers, Lugs, Cable Markers
- Termination Material
- Heat Shrink Sleeves
- Cable Ties
- Cable Glands (Weatherproof, Ex. Brass, Stainless Steel, Nickel Plated)

With a strong supply chain network, we guarantee quality, competitive pricing, and timely delivery-helping clients keep projects on track without delays.

We Supply all kind of Electrical Equipment, Field instruments, Automation system and all kinds of cables.

Products Range

**Crafting
the Future,
Today**

Pipes & Tubes

IMS supplies extensive range of seamless and welded pipes in all grades. We stock Carbon Steel, stainless steel, duplex, Ductile Iron pipes, etc in varied sizes.

Fittings

IMS supplies latest fittings extensively used by the industry. Ranges from butt welded, forged, malleable iron and ductile iron fittings in all size, grades and constructions in carbon steel and stainless steel.

Flanges

We offer industry-standard flanges in carbon steel and stainless steel, including weld neck, slip-on, blind, threaded, and socket-weld types in various sizes and pressure ratings.

Valves

Our valve range covers ball, gate, globe, check, butterfly, diaphragm, solenoid, needle, and Y-strainer valves, designed for reliable flow control in demanding environments.

Multifarious Accessories

We provide a comprehensive selection of industrial accessories to support piping systems, ensuring compatibility, safety, and efficient installation.

Pipes & Tubes
